

Dear Three Wise Men,

Sorry for not writing before. I remember you with love and nostalgia. This year I want to go back to my childhood and recover the lost time. The world has changed so much that it's surprising that the important things of the human race and nature are still equal or have worsened. Because of the behavior of human beings there are wars even now in the world, people continue killing children, poverty invades our cities and nature is being destroyed.

With the years, the petitions have changed and now I realize how difficult it is to write this letter without the excitement and innocence of a child. I would like you to bring us this year a little 'WISDOM' to illuminate the world's politicians in the best way to help humanity. 'WORDS' to improve the communication and understanding between men and women. 'GENEROSITY' to help and know how to forgive others. 'GOOD HUMOR' to enjoy the wonderful things in life.

Loads of optimism for our society and finally a lot of patience to know how to wish for all these requests to come true.

Bring peace and harmony to the world!

Lots of kisses and hugs for all three,

Hillary

P.S. Remember you have hot milk and 'paparajotes' waiting for you next to the 'Belén.
